

In [2]: *# Exercise 1:*

```
def get_sum(x : list):  
    x = sorted(x)  
    return x[-1]  
  
x = get_sum([8,2,3,0,7])  
print("Maximum number is : ", x)
```

Maximum number is : 8

In [3]: *# Exercise 2:*

```
def swap(a,b):  
    return b,a  
  
x = swap("abc", "123")  
print("Values after swapping : ", x)
```

Values after swapping : ('123', 'abc')

In [5]: *# Exercise 3:*

```
def reverse_string(x):  
    str1 = ""  
    for i in x:  
        str1 = i + str1  
    return str1  
  
y = reverse_string("1234abcd")  
print("Reverse sting is : ", y)
```

Reverse sting is : dcba4321
